

PRESS RELEASE – 20/10/06

EarlyCare at Lyons

CMP Northern Pty Ltd is pleased to announce that it has been selected by the Lyons Joint Venture partners to construct and operate a child care facility for the new suburb of Lyons. Construction of the centre is scheduled to commence in the first quarter of 2007 and the facility to be operational in the third quarter of 2007.

The centre will operate as EarlyCare Lyons, as part of the CMP Group, a privately owned and managed boutique child care operator. The new facility will cater for the early educational care of children from 6 weeks to 5 years and operate 52 weeks a year.

“We are excited to be involved in the development and support of the community of Lyons. As a boutique child care service provider, our service will support parental roles and assist in meeting the development of the children of Lyons in their early years.”

“While the new facility will be state of the art incorporating the most up to date care, learning and management systems, we realise that child care and early education is more than just the facilities. While these are important, it is the relationship between children, families and the centre staff that creates the environment for successful care and learning. We look forward to meeting and exceeding community expectations at EarlyCare Lyons.”
